#### Section 3 – Investment Objectives and Risk Tolerance

This section of the MCQ asks about your Municipality's Money that it Does Not Require Immediately (MNRI).

In general, investors can expect a higher annualized rate of return if the investor is also willing to accept volatility or fluctuation in the market value of their investments. For example, investors can expect that the average annual rate of return over a five-year period will be higher where the portfolio's returns are varied when measured on a year-by-year basis, with some years possibly having negative returns.

A portfolio which has a steady return year over year, with little possibility of negative returns in any year, will most likely have a lower annualized return when measured on a rolling five-year average.

4. In relation to MNRI, which of the following best reflects your Municipality's longer-term investment objectives (return), risk tolerance (volatility of returns) and shorter-term tolerance for losses (actual or unrealized)?

Description	Investment Objective	Risk Tolerance	Tolerance for short- term (3 year) losses*
Lower risk / return	Capital preservation is the main objective.  Willingness to accept lower returns to reduce the likelihood of losses.	Small chance of loss of capital over a 5- year period	Less than 5% decline
Moderate risk / return	Balanced growth (combination of growth and income) is the main objective.  Willingness to accept moderate level of risk to achieve moderate growth without excessive risk to capital.	Moderate chance of loss of capital over a 5-year period	5-15% decline
Higher risk / return	Growth of capital is the main objective.  Willingness to accept higher risk, including risk of loss of capital, for potentially higher returns.	Higher risk of loss of capital over a 5- year period	More than 15% decline

<sup>\*</sup> These percentages are for illustrative purposes only, to determine sensitivity to potential capital loss, and do not represent a guarantee by ONE JIB or ONE Investment.

5.	If applicable, is there any other information about your Municipality's investment objectives and risk tolerance for its MNRI that is relevant to your Investment Policy Statement or Investment Plan?
6.	How sensitive is your municipality to recognizing investment gains and losses from portfolio adjustments and market fluctuations?
th	ctions 4 and 5 of this MCQ below ask about your Municipality's MNRI, cash flow and other financial assets at may be applicable. It is intended to assist ONE Investment in obtaining an understanding of your unicipality's financial circumstances, including its cash flow needs.
Se	ection 4 – Financial Information
7.	Please provide your municipality's <b>MNRI</b> (see note below) by reserve (or reserve categories) with expected investment time horizons. This information can be provided in the template provided, or in a separate document.
	<b>Note:</b> MNRI can be determined by time, source of funds, purpose of funds, or such other means as your Municipality may decide is appropriate. It is defined for your municipality in the Investment Policy Statement approved by your Council. For example, the 'less than 3 years' column of MNRI in the template might not be applicable for all municipalities.
